Yes, let's try it seeing as how the technical report should have already been completed now.

Thanks Dave, I will send this on to Ecology. This PPA goes into effect 1 July, so I'm assuming you're still okay with July 21st ?

Jo

Hi Jo, I have one thing to add for 3G after talking with Ragsdale. This can either be 3H or part of 3G. I open to adjusting the date I picked, but picked July 21 thinking this PPA will not going into effect until end of June?

- 3G. EPA will assist with Ecology's South Puget Sound Dissolved Oxygen Study. EPA will continue to serve on the advisory committee and track issues related to dischargers they permit (most importantly the Fort Lewis treatment plant). Ecology will provide EPA with a schedule for completing the South Puget Sound DO Technical Study by July 21, 2013.

thanks

Hi Jo,
Attached you'll find EPA's proposed edits to the Water Quality Cleanup-Plan (TMDL) section (3A-

3G). Helen Bresler at Ecology has already reviewed these changes, and she's fine with them.

Thanks,

Laurie

R10 Water Quality Staff:

Attached please find Ecology Water Quality Program's proposed edits to Chapter 9 in the next PPA (2013-2015). It looks pretty messy with track changes, but I've been told we're making good progress. Please share it with your staff and update EPA assignments in each section. Also, as a reminder, in many cases, *less is more*.

Even though I'm sending this two days later than anticipated, we still need to have edits back to Ecology by **Wednesday, February 27th**. This only provides one day to review all the edits before the next round of the PPA negotiation process.

Please contact me if you have questions. Thanks everyone!
Jo
